

**Woodford**  
MEDICAL AESTHETICS

**The benefits of having Blepharoplasty (eyebag/eyelid) surgery are:**

- Improved appearance
- A more youthful look
- A less "tired" and more refreshed looking face
- Increased self-esteem and self confidence
- A less restricted vision in some cases

*'Mr Sameh Hindi is charming, totally professional and thorough. He is primarily an Ophthalmic Surgeon, which for me was the over-riding positive...he knows eyes! That was, for me, the biggest comfort factor. Mr Hindi really cares about the results, but then I am not surprised as he is associated with the Danbury Crew! Absolutely brilliant result as far as I am concerned!'*

Lesley - Blepharoplasty patient

Clinics: Danbury • London • Cambridge • Belfast • Leamington Spa

**Botox® Treatments for:**

- Lines and wrinkles

# Blepharoplasty Surgery for Eyebags & Eyelids

**For the removal of excess skin around the eyes to create a fresher and more youthful appearance.**

## Frequently Asked Questions

### What is a Blepharoplasty?

Blepharoplasty or eyelid/eyebag surgery is a cosmetic procedure to remove excess skin or fat from around the eyes which in turn gives a more youthful and alert appearance. This can be performed on the upper and lower lids.

### What are the causes of sagging in the eye area?

As we age the skin around the eye loses its elasticity and the muscles begin to weaken. This causes the skin to become loose and wrinkled and a general sagging takes place causing folds on the upper lid and bulging on the under eye area.

### What happens during surgery?

This procedure is performed under local anaesthetic at Woodford Medical. For the upper eyelid surgery a small incision is made along the natural crease of the upper eyelid and the fatty tissue is repositioned and the muscle tightened before carefully stitching to ensure a smooth and line-free result.

For the lower eyelid/eyebag an incision is made along the lower lash line before removing any excess fat commonly known as eye bags. The skin is then stretched to ensure an even finish and delicately stitched into place giving a smooth and bag-free appearance.

### How much does this procedure cost?

Every patient is an individual and exact cost will be given and fully explained during your consultation.

### Who will perform my Blepharoplasty?

#### Mr Sameh Hindi

LRCPS, LRCP, LRCS, MB BCH

Mr Sameh Hindi is a Consultant Ophthalmic Surgeon. He is a Fellow of the Royal College of Surgeons (Edinburgh and Glasgow) as well as a Fellow of the Royal College of Ophthalmologists.

His special clinic interests include Cataracts, Glaucoma, Oculoplastics and Blepharoplasty.

Mr Hindi has been working closely with Dr Allan and Dr Patterson for over 15 years performing Blepharoplasty on site at Woodford Medical Danbury.

### What's next?

Contact Woodford Medical to arrange an initial consultation with Mr Hindi who will ask about your health and medical history and discuss your suitability for this procedure. He will also discuss with you what will happen before, during and after your procedure and how you might feel. This is also an opportunity to ask about any concerns you might have so you can be fully informed before giving your consent.
